

ANIMAL MEDICAL CENTER OF CHANDLER

Keep your puppy or kitten healthy for less with our monthly payment plan

Puppies need frequent veterinary care in their first year of life to ensure maximum health. Our wellness plans feature budget-friendly monthly payments making it easy to manage your pet's healthcare costs.

Why does your puppy or kitten need preventive care?

Illness is more common than you think

Young pets are highly susceptible to diseases because their immune systems aren't yet fully developed. It's important to vaccinate and deworm your pet on a regular schedule in order to provide the maximum protection.

Growing bones need special care

Young pets seem to get bigger right before our eyes. Such rapid growth can come with its own set of problems. Examinations are needed frequently in order to make sure their growth and development is on the right track.

Prevention is the key to better health

Preventive care can help set the foundation for a lifetime of good health, so you and your pet can spend more quality years together. It's essential for detecting diseases early on, before they become more serious – and more expensive.
